Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 6-12, 15, 17, 18, 26, 27 and 30-35 allowed.
2. Claims 20 and 22-25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Raajmakers et al. (2002/00521124) in view of Halliyal et al. (6,319,775).

Regarding Claims 19 and 21, Raajmakers et al. disclosed in SITU dielectric stacks where in paragraph 21 and claims 4 and 25, it is disclosed deposition of oxide layer and deposition of nitride layer on oxide layer with different temperatures. Raajmakers et al. fail to disclose the required transferring of substrate to a different chamber between the deposition of oxide and nitride layers. However, Halliyal et al. disclose nitridation process for fabricating an ONO floating-gate electrode in a two-bit EEPROM device where claims 5 and 9 the required transferring method is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required transfer method in Raajmakers et al. as

taught by Halliyal et al. in order manufacture a semiconductor device with increased reliability.
